

CIVL 447 – Traffic Engineering
Syllabus
1st Semester 2012/2013

Coordinating Unit:	Department of Civil and Environmental Engineering, Faculty of Science and Technology		
Supporting Unit(s):	Nil		
Course Code:	CIVL447	Year of Study:	4
Course Title:	Traffic Engineering		
Compulsory/Elective:	Elective		
Course Prerequisites:	Nil		
Prerequisite Knowledge:	Basic Statistics ; Computer Skills		
Duration:	One semester	Credit Units:	3
Class/Laboratory Schedule:	Three hours of lecture per week along the traffic counts sessions		
Laboratory/Software Usage:	Nil		
Course Description:	This course deals with fundamental introduction of traffic engineering, such as human factor design, geometric design and section design, traffic flow theory analysis, capacity analysis, traffic count methods, signalized intersection analysis; introduction of ITS		
Course Objectives:	<ol style="list-style-type: none"> 1. To appreciate the traffic engineering as application of engineering techniques to achieve the safe and efficient movement of people and goods. 2. To understand the relationship between different parts of traffic engineering 		
Learning Outcomes (LO):	<p>Upon completion of this course, students should be able:</p> <ol style="list-style-type: none"> 1. To understand the human factors in traffic engineering design (POs: a, e) 2. To design the cross-section and alignment of highway (POs: a, c, e) 3. To use an appropriate traffic flow theory for traffic characteristics (POs: a, e) 4. To practice the traffic count methods (POs: b, d) 5. To comprehend the capacity and signalized intersection analysis (POs: a, c, e) 6. To understand the basic knowledge of ITS (POs: h) 		
Texts & References: (* recommended textbook(s))	<ol style="list-style-type: none"> 1. *Traffic Engineering (3rd Edition) by Roger P. Roess, Elena S. Prassas, and William R. McShane (Hardcover - Jan 24, 2004). 2. Principles of Highway Engineering and Traffic Analysis, by F L Mannering and W P Kilareski, Wiley, New York, September 2008. 3. Fundamentals of Transportation Engineering, by Jon D. Fricker and Robert K. Whitford , latest edition, Prentice Hall, New Jersey, 2004. 4. Transportation Engineering: An Introduction, by C J Khisty & B K Lall, 3rd edition, Prentice Hall, New Jersey, 2002. 		
Student Assessment:	<ul style="list-style-type: none"> • Assignments, presentation and report: 25%; • One midterm: 25%; • One final examination: 50% 		
Learning Outcome Assessment:	<ul style="list-style-type: none"> • Midterm and final examination. • Course evaluation 		

Pedagogical Methods:	<input checked="" type="checkbox"/> Lecture <input type="checkbox"/> Guest speakers <input type="checkbox"/> Case study <input type="checkbox"/> Role playing <input checked="" type="checkbox"/> Student presentation <input type="checkbox"/> Project <input type="checkbox"/> Simulation game <input checked="" type="checkbox"/> Exercises and problems	<input type="checkbox"/> Service learning <input type="checkbox"/> Internship <input type="checkbox"/> Field study <input type="checkbox"/> Company visits <input type="checkbox"/> e-learning <input checked="" type="checkbox"/> Independent study <input type="checkbox"/> Others: <u>Computer software</u> <u>Lab.</u>
----------------------	--	---

Major Assessment Methods: For each Major Assessment Method below, please indicate the specific pedagogical methods involved (by putting a ✓ in the relevant box(es) on the right-hand side).	Case Study	Role Playing	Student Presentation	Individual project/paper	Group project/paper	Simulation Game	Exercises & problems	Service learning	Internship	Field Study	Company visits	Written examination	Oral examination	Others (please specify)
Class Participation/ Discussion (0%)														
Quiz/Assignment/Report(s) (25%)			✓				✓			✓				
Test(s) (25%)												✓		
Examination (50%)												✓		
Others (please specify) _____ (0 %)														
Course Web: (if any)	Course materials are available in UMMoodle (http://webcourse.umac.mo/).													

Syllabus

Weeks	Topics	LO No.
1-2	Introduction <ul style="list-style-type: none"> ◆ Traffic engineering discipline ◆ Transportation engineering ◆ The transportation system Vehicle motion and human factors <ul style="list-style-type: none"> ◆ Vehicle motion ◆ Human factors: perception reaction ◆ Human factors: dilemma zones 	1
3-4	Geometric design of highways <ul style="list-style-type: none"> ◆ Principles of highway alignment ◆ Vertical alignment ◆ Horizontal alignment Fundamentals of pavement design <ul style="list-style-type: none"> ◆ Pavement types: flexible and rigid pavements ◆ Principles of flexible pavement design ◆ The AASHTO flexible pavement design procedure ◆ The AASHTO rigid pavement design procedure 	2
5-7	Elements of traffic flow analysis <ul style="list-style-type: none"> ◆ Traffic flow, speed and density ◆ Basic traffic stream models ◆ Models of traffic flow ◆ Queuing theory and traffic flow analysis ◆ Traffic analysis at highway bottlenecks 	3
8-9	Traffic Count Method <ul style="list-style-type: none"> ◆ Traffic flow counting ◆ Travel speed measurement 	4
10	Mid Term Examination	1,2,3
11-12	Traffic analysis at signalized intersections <ul style="list-style-type: none"> ◆ Analysis of signalized intersections with D/D/1 Queuing ◆ Analysis of signalized intersections with probabilistic arrivals ◆ Signal timing design procedure 	5
13	Highway capacity and level of service analysis <ul style="list-style-type: none"> ◆ Level of service ◆ Service flow rate and level of service ◆ Capacity for freeway segments 	5
14	Intelligent Transportation System <ul style="list-style-type: none"> ◆ Background ◆ Objective of ITS development ◆ Area and current trends 	6
