# University of Macau <br> Faculty of Science and Technology <br> Department of Computer and Information Science <br> SFTW422 Logic and Computability <br> Syllabus <br> $2^{\text {nd }}$ Semester 2011/2012 <br> Part A - Course Outline 

## Elective course in Computer Science

## Course description:

(3-2) 4 credits. Introduction to logic, propositional calculus and predicate calculus, resolution and logic programming, temporal logic and formalization of programs, also computability will be introduced.

## Course type:

Theoretical

## Prerequisites:

- SFTW223

Textbook(s) and other required material:

- M. Ben-Ari. (2001) Mathematical Logic for Computer Science, 2nd ed., Springer.

## References:

- E. Mevdelson. (1987) Introduction to Mathematical Logic. 3rd ed., Wadsworth \& Brooks/Cle.
- C. C. Leary. (2000) A Friendly Introduction to Mathematical Logic. Prentice Hall.

Major prerequisites by topic:

- Basic concepts of propositional logic.
- Discrete mathematics.
- Elements of theory of computation.
- Methods for constructing mathematical proofs.

## Course objectives:

- Introduce formal system (propositional and predicate logic) which mathematical reasoning is based on (a)
- Develop an understanding of how to read and construct valid mathematical arguments (proofs) (a, e)
- Understand mathematical statements (theorems), including inductive proofs (a, e)
- Introduce and work with various problem solving strategies and techniques (a, e, k)

## Topics covered:

- Basic Concepts (2 hours): Logic and Reasoning.
- Formal Systems (2 hours): Propositional Logic and Predicate Logic.
- Propositional Calculus (10 hours): Syntax, Semantics, Tableaux, Equivalence, Satisfiability, Validity and Consequence, Deductive Proofs and Resolution.
- Predicate Calculus ( $\mathbf{1 2}$ hours): Syntax, Semantics, Tableaux, Interpretations, Satisfiability, Deduction and Resolution
- Propositional Temporal Logic (8 hours): Syntax, Semantics, Tableaux, Soundness and Completeness.
- Formalization of Programs ( $\mathbf{6}$ hours): Axiomatization of Language, Formal Specification, Formal Methods and Formal Verification of Programs.

Class/laboratory schedule:

| Timetabled work in hours per week |  | No of teaching <br> weeks | Total <br> hours | Total <br> credits | No/Duration <br> of exam <br> papers |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Lecture | Tutorial |  | 14 | 70 | 4 | $1 / 3$ hours |
| 3 | 2 | Nil |  |  |  |  |

## Student study effort required:

| Class contact: |  |
| :--- | ---: |
| Lecture | 42 hours |
| Tutorial | 28 hours |
| Other study effort |  |
| Self-study | 25 hours |
| Homework assignment | 15 hours |
| Total student study effort | 110 hours |

## Student assessment:

Final assessment will be determined on the basis of:

| Attendance | $5 \%$ | Homework | $10 \%$ |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $1^{\text {st }}$ Mid-term | $25 \%$ | $2^{\text {nd }}$ Mid-term | $25 \%$ | Final exam | $35 \%$ |

## Course assessment:

The assessment of course objectives will be determined on the basis of:

- Homework and exams
- Course evaluation

Course outline:

| Weeks | Topic | Course work |
| :---: | :--- | :---: |
| 1 | Introduction basis of software, morphology, propositional calculus, <br> Mathematical bas of propositional calculus, logic programming, <br> generalization of <br> non-standard logic |  |
| $2-4$ | Propositional Calculus <br> Operators, formulas, interpretations, satisfiability, validity, semantic <br> tableaux, deductive proofs, Gentzen systems, Hilbert systems, <br> resolution | Assignment 1,2 |
| $5-7$ | Predicate Calculus <br> Relations, predicates, interpretations, logic equivalence, substitution, <br> semantic tableaux, Gentzen system Hilbert system, functions, clausal <br> form, Herbrand models | Midterm 1 <br> Assignment 3 |
| $8-10$ | Ground Resolution <br> Substitution, unification, most general unifier, unification algorithms, <br> general resolution, theorem proving, logic programming | Assignment 4 |
| $11-12$ | Temporal Logic <br> Syntax and semantics of PTL, deductive system for linear PTL, <br> sematic tableaux, soundness and completeness | Midterm 2 <br> Assignment 5 |
| $13-14$ | Formalization of Programs <br> Axiomalization of language, deductive system for Hoare Logic, <br> proving programs | Assignment 6 |

## Contribution of course to meet the professional component:

This course prepares students with fundamental knowledge of mathematical logic for computer science.

## Relationship to CS program objectives and outcomes:

This course primarily contributes to the Computer Science program outcomes that develop student abilities to:
(a) an ability to apply knowledge of mathematics, science, and engineering.
(e) an ability to identify, formulate, and solve engineering problems.

This course secondarily contributes to the Computer Science program outcomes that develop student abilities to: (k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Relationship to CS program criteria:

| Criterion | DS | PF | AL | AR | OS | NC | PL | HC | GV | IS | IM | SP | SE | CN |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Scale: $\mathbf{1}$ (highest) to 4 (lowest) | 1 |  | 2 |  |  |  |  |  |  |  |  |  | 4 |  |

Discrete Structures (DS), Programming Fundamentals (PF), Algorithms and Complexity (AL), Architecture and Organization (AR), Operating Systems (OS), Net-Centric Computing (NC), Programming Languages (PL), Human-Computer Interaction (HC), Graphics and Visual Computing (GV), Intelligent Systems (IS), Information Management (IM), Social and Professional Issues (SP), Software Engineering (SE), Computational Science (CN).

Course content distribution:

| Percentage content for |  |  |  |
| :---: | :---: | :---: | :---: |
| Mathematics | Science and engineering subjects | Complementary electives | Total |
| $50 \%$ | $50 \%$ | $0 \%$ | $100 \%$ |

## Coordinator:

Dr. Fai Wong

## Persons who prepared this description:

Dr. Fai Wong, Prof. Yi Ping Li

## Part B - General Course Information and Policies

2nd Semester 2011/2012

| Instructor: | Prof. Yi Ping Li | Office: | N411 |
| :--- | :--- | :--- | :--- |
| Office hour: | to be announced | Phone: | 83974461 |
| Email: | ypli@umac.mo |  |  |

Time/Venue: to be announced

Grading distribution:

| Percentage Grade | Final Grade | Percentage Grade | Final Grade |
| :---: | :--- | :---: | :---: |
| $100-93$ | A | $92-88$ | A- |
| $87-83$ | B+ | $82-78$ | B |
| $77-73$ | B- | $72-68$ | C+ |
| $67-63$ | C | $62-58$ | C- |
| $57-53$ | D+ | $52-50$ | D |
| below 50 | F |  |  |

## Comment:

The objectives of the lectures are to explain and to supplement the text material. Students are responsible for the assigned material whether or not it is covered in the lecture. Students who wish to succeed in this course should read the textbook prior to the lecture and should work all homework assignments. You are encouraged to look at other sources (other texts, etc.) to complement the lectures and text.

## Homework policy:

The completion and correction of homework is a powerful learning experience; therefore:

- There will be approximately 6 homework assignments.
- Homework is due one week after assignment unless otherwise noted, no late homework is accepted.
- Homework must be neatly typed and printed on a word-processor.
- The course grade will be based on the average of the HW grades.

## Exams:

Two mid-term exams will be held during the semester.

## Note:

- Check UMMoodle (https://ummoodle.umac.mo/) for announcement, homework and lectures. Report any mistake on your grades within one week after posting.
- No make-up exam is given except for CLEAR medical proof.
- Cheating is absolutely prohibited by the university.

## Appendix:

Rubric for Program Outcomes

| Rubric for (a) | 5 (Excellent) | 3 (Average) | 1 (Poor) |  |
| :---: | :---: | :---: | :---: | :---: |
| Understand the <br> theoretic <br> background | Students understand <br> theoretic background and <br> the limitations of the <br> respective applications. | Students have some <br> confusion on some <br> background or do not <br> understand theoretic <br> background completely. | Students do not understand <br> the background or do not <br> study at all. |  |
|  |  |  |  |  |
| Rubric for (e) | 5 (Excellent) | 3 (Average) | 1 (Poor) |  |
| Modeling, <br> problem <br> formulation <br> and problem <br> solving | Students choose and <br> properly apply the correct <br> techniques. | Students model correctly <br> but cannot select proper <br> technique or model <br> incorrectly but solve <br> correctly accordingly. | Students at loss as to how <br> to solve a problem. |  |
|  |  |  |  |  |
| Rubric for (k) | 5 (Excellent) | 3 (Average) | 1 (Poor) |  |
| Use modern <br> principles, <br> skills, <br> in engineering tools <br> practice | Student applies the <br> principles, skills and tools <br> to correctly model and <br> analyze engineering <br> problems, and understands <br> the limitations. | Student applies the <br> principles, skills and tools <br> to analyze and implement <br> engineering problems. | Student does not apply <br> principles and tools <br> correctly and//r does not <br> correctly interpret the <br> results. |  |
