Welcome Letter

Date: May 4, 2026

Dear Esteemed Guests, Colleagues, and Friends,

It is our great pleasure to welcome you to the “**2026 Macau International Symposium on Radiotheranostics**”, hosted at the **University of Macau & University of Macau Advanced Research Institute in Hengqin**, a hub for academic excellence and innovation during May 12-13 2026. During the symposium, we will gather at a premier center for academic excellence and innovation to explore the rapidly evolving landscape of radiotheranostics in precision medicine.

This year’s program highlights recent breakthroughs in precision radiotheranostics clinical applications, quantitative imaging and AI-powered dosimetry—fields that are fundamentally transforming management for oncology patients. We have brought together leading researchers, clinicians, and industry pioneers to exchange insights.

We are honored to host distinguished speakers and leaders in the field who will provide valuable perspectives on molecular imaging and therapeutic applications. Your participation is instrumental in fostering meaningful discussions and advancing research in these fields.

Beyond the scientific program, we encourage you to experience the unique blend of tradition and modernity that defines Macau/Hengqin. We hope this symposium not only advances your research and clinical practice but also provides valuable opportunities for networking, partnership building, and cultural exploration.

Thank you for joining us. We wish you a highly productive and inspiring symposium.

Warm regards,

Georges El Fakhri
